

One City. One Problem.

An eight-part live series for local government. Each 90-minute session takes one city, one real infrastructure problem, and a panel that has to solve it in front of the room — no slideware, no product tour, no vendor keynote.

WATER • GRID • CORRIDORS • BRIDGES • FACILITIES • TWINS

Hosted by ConnectMii · connectmiievents.com

Ninety minutes. One decision.

The same six-beat structure runs every episode, so your team knows exactly what to expect.

0:00

10 MIN

The Problem

The moderator sets the city, the asset, the data on hand, the budget and the decision due this year.

0:10

15 MIN

The First Response

Each specialist gives an opening approach. One defined question per expert. No corporate overviews.

0:25

10 MIN

The Complication

New information lands mid-conversation: the grant moves, the corridor can't close, the as-builts are wrong.

0:35

25 MIN

Build the Solution

The panel resolves sequence, method, accuracy, cost, risk and downstream use of the data.

1:00

15 MIN

The Room Decides

Live polls and questions. Public-sector attendees say how they'd handle the same call.

1:15

15 MIN

The Path Forward

"If this were our city" — closing with three practical actions an agency can start on Monday.

WHAT YOU LEAVE WITH

Scenario brief

The full written problem, data set and constraints for your own team session.

Decision worksheet

The tradeoff framework the panel used, editable for your asset.

Three Monday actions

Concrete first steps, sized for a real public-agency budget cycle.

01

PUBLIC WORKS · WATER

The Water System We Can't See

Prioritizing a buried network when the records are a generation old.

SEP 16, 2026

[REGISTER →](#)

02

PUBLIC WORKS · ENERGY

Keeping the Lights On

Grid resilience when both the load and the weather keep changing.

OCT 28, 2026

[REGISTER →](#)

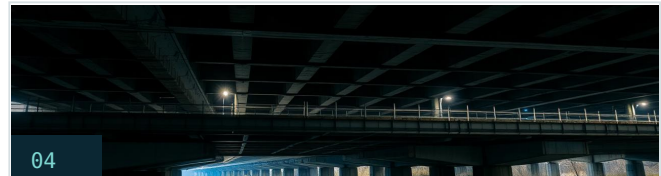

03

TRANSPORTATION

The Corridor That Can't Close

Rebuilding a working arterial without shutting the city down.

DEC 9, 2026

[REGISTER →](#)

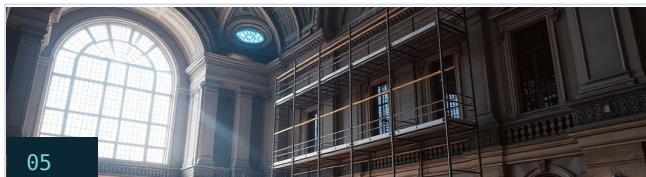

04

ROADS & BRIDGES

The Bridge on the Deferred List

Repair or replace when the inspection rating just says 'fair'.

JAN 27, 2027

RUN IT AS A WORKSHOP

1 Watch together

Book a 90-minute room. Play the episode live or on demand with the people who own the asset.

2 Swap in your city

Replace the scenario's numbers with yours: age, condition, budget, deadline, political constraint.

3 Leave with three actions

Write the Monday actions on the board and assign an owner and a date to each one.

SERIES SPONSOR

Bentley Systems

Bentley Systems is the infrastructure engineering software company. Its applications and the Bentley Infrastructure Cloud support the water, transportation, bridge, facility and city-planning workflows discussed in every session — from survey and modeling through construction and operations.
